

REAGENS CL/49

DESCRIPTION Non toxic, liquid Ca-Zn stabiliser.

APPLICATION Reagens CL/49 has been developed on purpose to meet food contact regulations in both suspension and paste resin based formulations. It offers crystal clarity and excellent colour hold, and is particularly suited to the production of blown film and extrusion of transparent items.

DOSAGE Recommended dosage: 1 - 3 phr

PHYS.-CHEM.
PROPERTIES

	UNITS	VALUES	METHODS
Appearance:		amber liquid	Visual
Density at 25°C:	g/cc	0.98	APF19000
Refractive index at 25°C:	nD	1.504	APF02400
Colour:	Gardner	<9	APF18000

PACKAGING Drums (content 200 Kg) or intermediate bulk containers (content 1000 Kg), conform to the UN regulations.

STORAGE Store in a suitable area. Keep away from heat sources.
Maximum recommended storage time: 12 months from date of delivery.
